

VIRTUAL SPEED CAMERA

Focus on safety

Speed is an important factor in road safety. It not only affects the severity of a crash, but is also linked to the risk of being involved in a crash. You need to protect your business, CSA score and reputation.

EROAD has developed a powerful tool for you to pinpoint areas of risk and set your own safe operating speed for your fleet. With our virtual speed camera solution, you can encourage extra care around your key risk areas such as customer sites, loading zones and schools. Become an industry leader in safety.

KEY FEATURES

- Set customized speed limits using our smart geofence capability
- Receive notifications immediately if a driver exceeds the limit
- Details of speeding events including location, date, time and duration
- Over Speed reports record virtual speed camera events and enable monitoring over time
