

# DRIVER VEHICLE INSPECTION REPORT

## Prevention is better than cure

Fixing a problem before it becomes a breakdown is much less expensive than paying for emergency roadside repairs and late deliveries. Breakdowns hurt your bottom line and your reputation. Vehicle faults are also a major source of roadside infringements.

Proactively manage pre- and post-trip inspections with EROAD's Driver Vehicle Inspection Reports (DVIR) as your first line of defense.

The application supports your drivers to electronically complete and submit vehicle inspections and eliminates the administrative costs of managing paper-based inspections.

### KEY FEATURES

- Intuitive Android application for drivers to electronically complete and submit vehicle inspections
- Allows drivers to include additional checks and annotate their findings
- Electronically captures driver's signature and vehicle safety declaration
- Access to the latest report on the mobile device, access to all reports on EROAD's secure web platform Depot
- Set up real-time email notifications for failed vehicle inspections
