

Insurance, Service and Technology for Your Transportation Business

At LaPorte we focus on creating and delivering risk solutions for exposures faced by the transportation industry. Whether you are a long haul or a small interstate operation, our experienced insurance professionals will provide innovative insurance programs. Our specialists will partner with you to meet your objectives such as reducing overall insurance costs, improving your risk management program, and improving driver retention.

ACCESS TO THE RIGHT INSURANCE PROVIDERS

We partner with national and regional providers to build your insurance programs by providing safety, loss control, compliance and claims assistance. This allows us to market your company directly to the right insurance providers to meet your unique coverage needs.

REWARDS FOR YOUR SAFETY PERFORMANCE

We have access to alternative insurance products, which we can offer to the highest performing trucking companies. These programs focus on risk management support and programming to help attract/retain the industry's best drivers, and offer the potential for return premiums. Insurance premiums within these programs are developed based solely on the attributes of your company.

NATIONAL PRESENCE

Being active in national and regional trade associations allows us to stay informed of trends across the country.

CLAIMS

Experiencing a claim can be stressful, and the best way to minimize that is through communication. Our in-house claims team will provide quick and efficient assistance to keep you informed throughout the entire claims process.

TELEMATICS AND DRIVER TRAINING

Better Data & Training = Better Decisions

Technology is changing the trucking landscape. It provides the ability to analyze real-time and historical vehicle data, and drives improved fleet productivity, including better route planning, timely maintenance, and improved legal compliance.

LaPorte's Transportation Team provides specialty programming which allows carriers of all sizes to better understand their fleet performance, driver behavior and the resources required to become "best in class." We have partnered with the industry's leading technology providers to ensure our customers have access to proven resources to track and monitor fleet performance, improve operational transparency and enhance control.
