

Insurance for Your Dental Office

In today's environment, dental practices need a partner who understands the challenges of their industry. We will assess and help minimize your risks and develop an innovative insurance program that will meet your business needs. At LaPorte we can help you with your dental office package and also write your group benefits and personal lines insurance.

ACCESS TO THE RIGHT CARRIERS

LaPorte has access to the right markets who offer coverage to meet your unique needs. We represent nationally recognized carriers that can put together a comprehensive insurance plan that will write both your general and professional liability. Our premier market can write your professional liability on an occurrence basis versus a claims-made coverage. Why is this important? Occurrence coverage protects you against claims arising out of professional services you perform during the term of your policy-regardless of when the claim is made. If you transition from a claims made policy we can provide prior acts coverage to give you continuous protection.

EXPERTISE & EXPERIENCE

From understanding the risk your business faces, to the challenges and the complexity the industry presents, we have a dedicated team of professionals who provide insurance and risk management programs that are specifically designed for the dental practice industry. We work with you to deliver creative solutions to optimize your insurance program.

CLAIMS

Experiencing a claim can be stressful, and the best way to minimize this is through communication. Our in house claims administrator provides assistance quickly and efficiently, and will keep you informed throughout the entire process.
